

DDS400

The dds400-ZA/US Virtual Private Server / Dynamic Dedicated Server offers a higher level of power and available resources than the DDS200 and is a great choice for small application providers or those hosting e-commerce sites with RAM and/or CPU intensive scripts running. Hosting resellers will be able to host a moderate number of static and dynamic websites while still maintaining performance and realizing the advantages and cost savings of the VPS/DDS server model.

The DDS400 comes with Plesk (100 domain license) You may optionally add the Plesk Power Pack for a small monthly charge.

The dds400-ZA includes 1 IP, 1GB Ram, 40 GB of disk space and a 2 Mbps unmetered bandwidth connection. Bargain Power at R1195.00 p/m
