

DDS600

The dds600 has almost all of the power of a traditional dedicated server and is an excellent choice for hosting resellers and/or application providers requiring more serious dedicated resources. As part of our DDS product family it fits into the migration and scalability plan bringing you just one step from the fully dedicated server while still allowing you to take advantage of the cost savings and additional benefits of our Virtual Private Server / Dynamic Dedicated Server.

The DD600 comes with Plesk (unlimited domain license) and the option of the Plesk Power Pack for a small monthly charge.

The DDS600 includes 1 IPs, 80 GB of disk space, 1536 MB RAM and a 2 Mbps unmetered bandwidth connection.

Unmatched Performance for only R1995.00 p/m
